# To create Shared folder

- **From WINDOWS**
- Create shared folder from VM menu
- Share the "Desktop" folder.

To create Shared folder

- mkdir shared
- vmhgfs-fuse .host:/Desktop shared/ -o subtype=vmhgfs-fuse

  - N.B.:
  - shared: is a random name for a folder to mount the data into
  - Desktop is the name of the shared folder from windows

Install modelsim from shared folder

- cp modelsim_dlx-2022.4.aol ~/Installation
- cd ~/Installation
- mkdir modelsim
- ./modelsim_dlx-2022.4.aol
  - Install it in the directory you just created
- gedit ~/.bashrc &
  - Edit path to point to the new installation
  - export PATH=~/Installation/modelsim/modelsim_dlx/bin:$PATH:<whatever was here>
